

Repository Link: <https://github.com/jhutch50/TwitterTextCaptureAPI>

Instructions:

1. Type in the keyword you want to find
2. Type in the minimum date range within the week
3. Type in the max date range within the week
4. Finally, type in how many tweets you'd like to get.

The results will be 4 files created based on the requirements of the assignment.

(In order for the assignment to work, you will need to generate your own access token, access token secret, consumer key, and consumer secret)
